

Custom Web Portals Fact Sheet

Overview: JDR Solutions designs and builds custom web portals for banks, independent equipment lessors and manufacturer captives. The portals can allow lease customers to make payments online and dealers, vendors and business partners to view customer records, contract and payment histories and invoices, and create buyouts.

Services: Includes the four phases of portal development and life cycle, with applicable deliverables:

- Portal requirements identification: Functionality and features
- Portal building: According to client's specifications and branding
- Portal testing
- Portal implementation

Custom Web Portals Contact: Doug Williams, Vice President and Chief Information Officer
