

Custom Web Portals Fact Sheet

Overview: JDR Solutions designs and builds custom Web portals for banks, independent equipment lessors and manufacturer captives. The custom-built portals can allow lease customers to make payments online and dealers, vendors and business partners to view customer records, contract and payment histories and invoices, and create buyouts.

Services: Includes the four phases of portal development and life cycle, with applicable deliverables and services:

- Portal requirements identification
- Portal building
- Portal testing
- Portal implementation

Custom Web Portals Contact: Doug Williams, Vice President and Chief Information Officer
