

Software as a Service Fact Sheet

Overview: JDR Solutions hosts [International Decision Systems'](#) Rapport® and InfoLease® applications, and Rapport® and InfoLease® surrounds and interfaces in a cloud-based hosting environment.

Specifications:

- Technical architecture: JDR Solutions leverages [Expedient](#) data centers in North America for client account management. Expedient provisions a private cloud environment at its Indianapolis, IN, facility, which is mirrored real time at its Pittsburgh, PA, data center.
- Environments: Includes production, disaster recovery and user acceptance testing (UAT). JDR Solutions provisions a multi-tiered environment with separate and unique Web, applications, database, reporting and secure file transfer protocol (FTP).
- Information security: JDR Solutions complies with [American Institute of Certified Public Accountants](#) Security Organization Control (SOC) 1 and 2 requirements for internal financial integrity and operations procedure controls, and is certified compliant with Federal Deposit Insurance Corp. auditing standards. Access to JDR environments is limited to preauthorized white-listed IP address origination points, in conjunction with approved server and application authentication.
